

Your application - our pressure vessels

Further developed, continuously improved

Irregardless you operate domestically or worldwide during the development and production of pressurised systems we are your reliable partner.

- » We can ship standard vessels from 50 to 3.000 Liter capacity and 11 to 16 bar within 48 hrs, also coated according to your requirements
- » Special vessels we can design, calculate, test, manufacture and ship within in a short period of time

New for you:

- » Starting now we can deliver vessels up to diameters of 2.400mm, hot-dip galvanized (in- and outside)
- » Standard fittings sets, plugs and gaskets are available from our warehouse
- » Standard vessels for ambient temperatures from -20 °C to +50 °C are available since January 2015
